Message

West Bengal possess an unparalleled collection of biodiversity, extending from the majestic Himalayas in the north to the Bay of Bengal in the south and spanning from the arid laterite regions in the west to the eastern wetlands. Recognizing its paramount significance, the conservation of this biodiversity is crucial for the future of human civilization and the continued existence of all living beings.

Over the years, the Department of Forests, Government of West Bengal has effectively implemented diverse conservation strategies for forests and wildlife. These initiatives aim to uphold the principles of sustainable development while simultaneously enhancing the health of biodiversity and maintaining ecological equilibrium.

The Annual Report for the fiscal year 2023-2024, prepared by the Wildlife Wing of The Department of Forests, Government of West Bengal, meticulously details these commendable efforts undertaken by the Wing under the Directorate of Forests, WB, for the preservation of the state's wildlife. The report places particular emphasis on aspects such as wildlife conservation and management practices, population estimation of wild animals, strategies for managing human-animal conflict, combating wildlife trafficking, recognizing achievements through Wildlife Conservation Awards, promoting eco-tourism, and revenue generation.

I extend my sincere appreciation to the dedicated officers and staff of the Wildlife Wing in Kolkata, West Bengal for their diligent work in compiling the Annual Report for 2023-2024. Furthermore, I express my gratitude to all the field officers serving in various roles within the Forest Directorate. I wish this edition every success.

Birbaha Hansda
Minister of State (Independent Charge)

Message

West Bengal uniquely encompasses the majestic Himalayas in its north and the world's largest delta in its south, establishing it as a significant biodiversity hotspot in India. This rich biodiversity, while offering substantial tourism potential, also presents considerable challenges in managing and protecting its forests and wildlife.

The state's persistent dedication to wildlife conservation has yielded consistent positive results, evidenced by the annual increase in populations of different species like tigers, elephants, rhinoceroses, Indian bison, leopards and many others. This success, however, poses a substantial challenge in managing the escalating human-wildlife conflict within one of the most populous states in India.

The Department of Forests is actively engaged in all aspects of forest and wildlife management, placing particular emphasis on rigorous enforcement measures against illegal tree felling, timber smuggling, and the trade of wildlife or wildlife products.

The fundamental strategy for forest and wildlife management continues to rely on the Joint Forest Management Committees (JFMCs), which include residents of forest-adjacent areas. By sharing forest resources and providing livelihood support schemes, the JFMCs are fully engaged and serve as our primary line of defense.

The Annual Report for 2023-24 of the Wildlife Wing highlights the dedicated and often unseen work carried out by our officers and staff in safeguarding our forests and wildlife.

I extend my sincere best wishes to the Chief Wildlife Warden and his entire team.

Debal Ray, IFS
Principal Secretary
Department of Forests
Government of West Bengal

Message

Spanning a diverse topography from the coast to the highlands, West Bengal's Forest Directorate diligently works year-round to safeguard its rich wildlife and varied ecosystems. This crucial effort involves the active participation of forest fringe communities, who collaborate closely with foresters in the conservation process.

Within the realm of conservation, particularly in protected areas, the Wildlife Wing of West Bengal plays a central role. Each year, a range of both traditional and innovative strategies are conceived and implemented to advance conservation and mitigate human-wildlife conflict.

These concerted efforts have yielded notably positive outcomes. Strong administrative leadership coupled with effective on-the-ground execution has facilitated population growth across various wild animal species. Furthermore, recent years have witnessed the exciting discovery and rediscovery of numerous species previously unknown or thought to be absent from the state. Simultaneously, instances of human-wildlife conflict are being effectively managed and kept under control.

This Annual Report for 2023-24 serves as a detailed chronicle of the performance and accomplishments of the Wildlife Wing, West Bengal, throughout the year. It aims to be a vibrant record of the commendable work undertaken by the wing.

Debal Ray, IFS
Principal Chief Conservator of Forests
& Head of Forest Force, West Bengal

FOREWORD

Sandeep Sundriyal, IFS

**Principal Chief Conservator of Forests, Wildlife
& Chief Wildlife Warden, West Bengal**

**Government of West Bengal
Wildlife Wing
Directorate of Forests
Bikash Bhavan, North Block, 3rd Floor,
Salt Lake City, Kolkata 700091**

Foreword

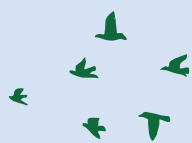

The Annual Report for 2023-24 meticulously records the events and information pertaining to the protection and conservation initiatives undertaken by the Wildlife Wing of West Bengal. It is my sincere hope that this document will prove to be a valuable resource for both the dedicated staff and officers of the Department, as well as for the general public who share an interest in this crucial field.

West Bengal boasts a remarkable faunal diversity encompassing nearly all taxa, from protozoa to mammals. As a recognized biodiversity hotspot and center of origin, the state provides shelter to a wide spectrum of critically endangered species, notably tigers, Asian elephants, red pandas, leopards, clouded leopards, greater one-horned rhinoceroses, estuarine crocodile, Gangetic dolphins, Batagur baska, and numerous others. The protection and conservation of this unique diversity entails lot of efforts by the staffs at all levels.

I wish to express my deep appreciation to the diligent officers and staff of the Wildlife Wing in Kolkata, West Bengal, for their committed efforts in preparing this Annual Report for 2023-2024. Furthermore, I extend my gratitude to all the field officers within the Forest Directorate and to everyone who contributed valuable information and photographs to this publication.

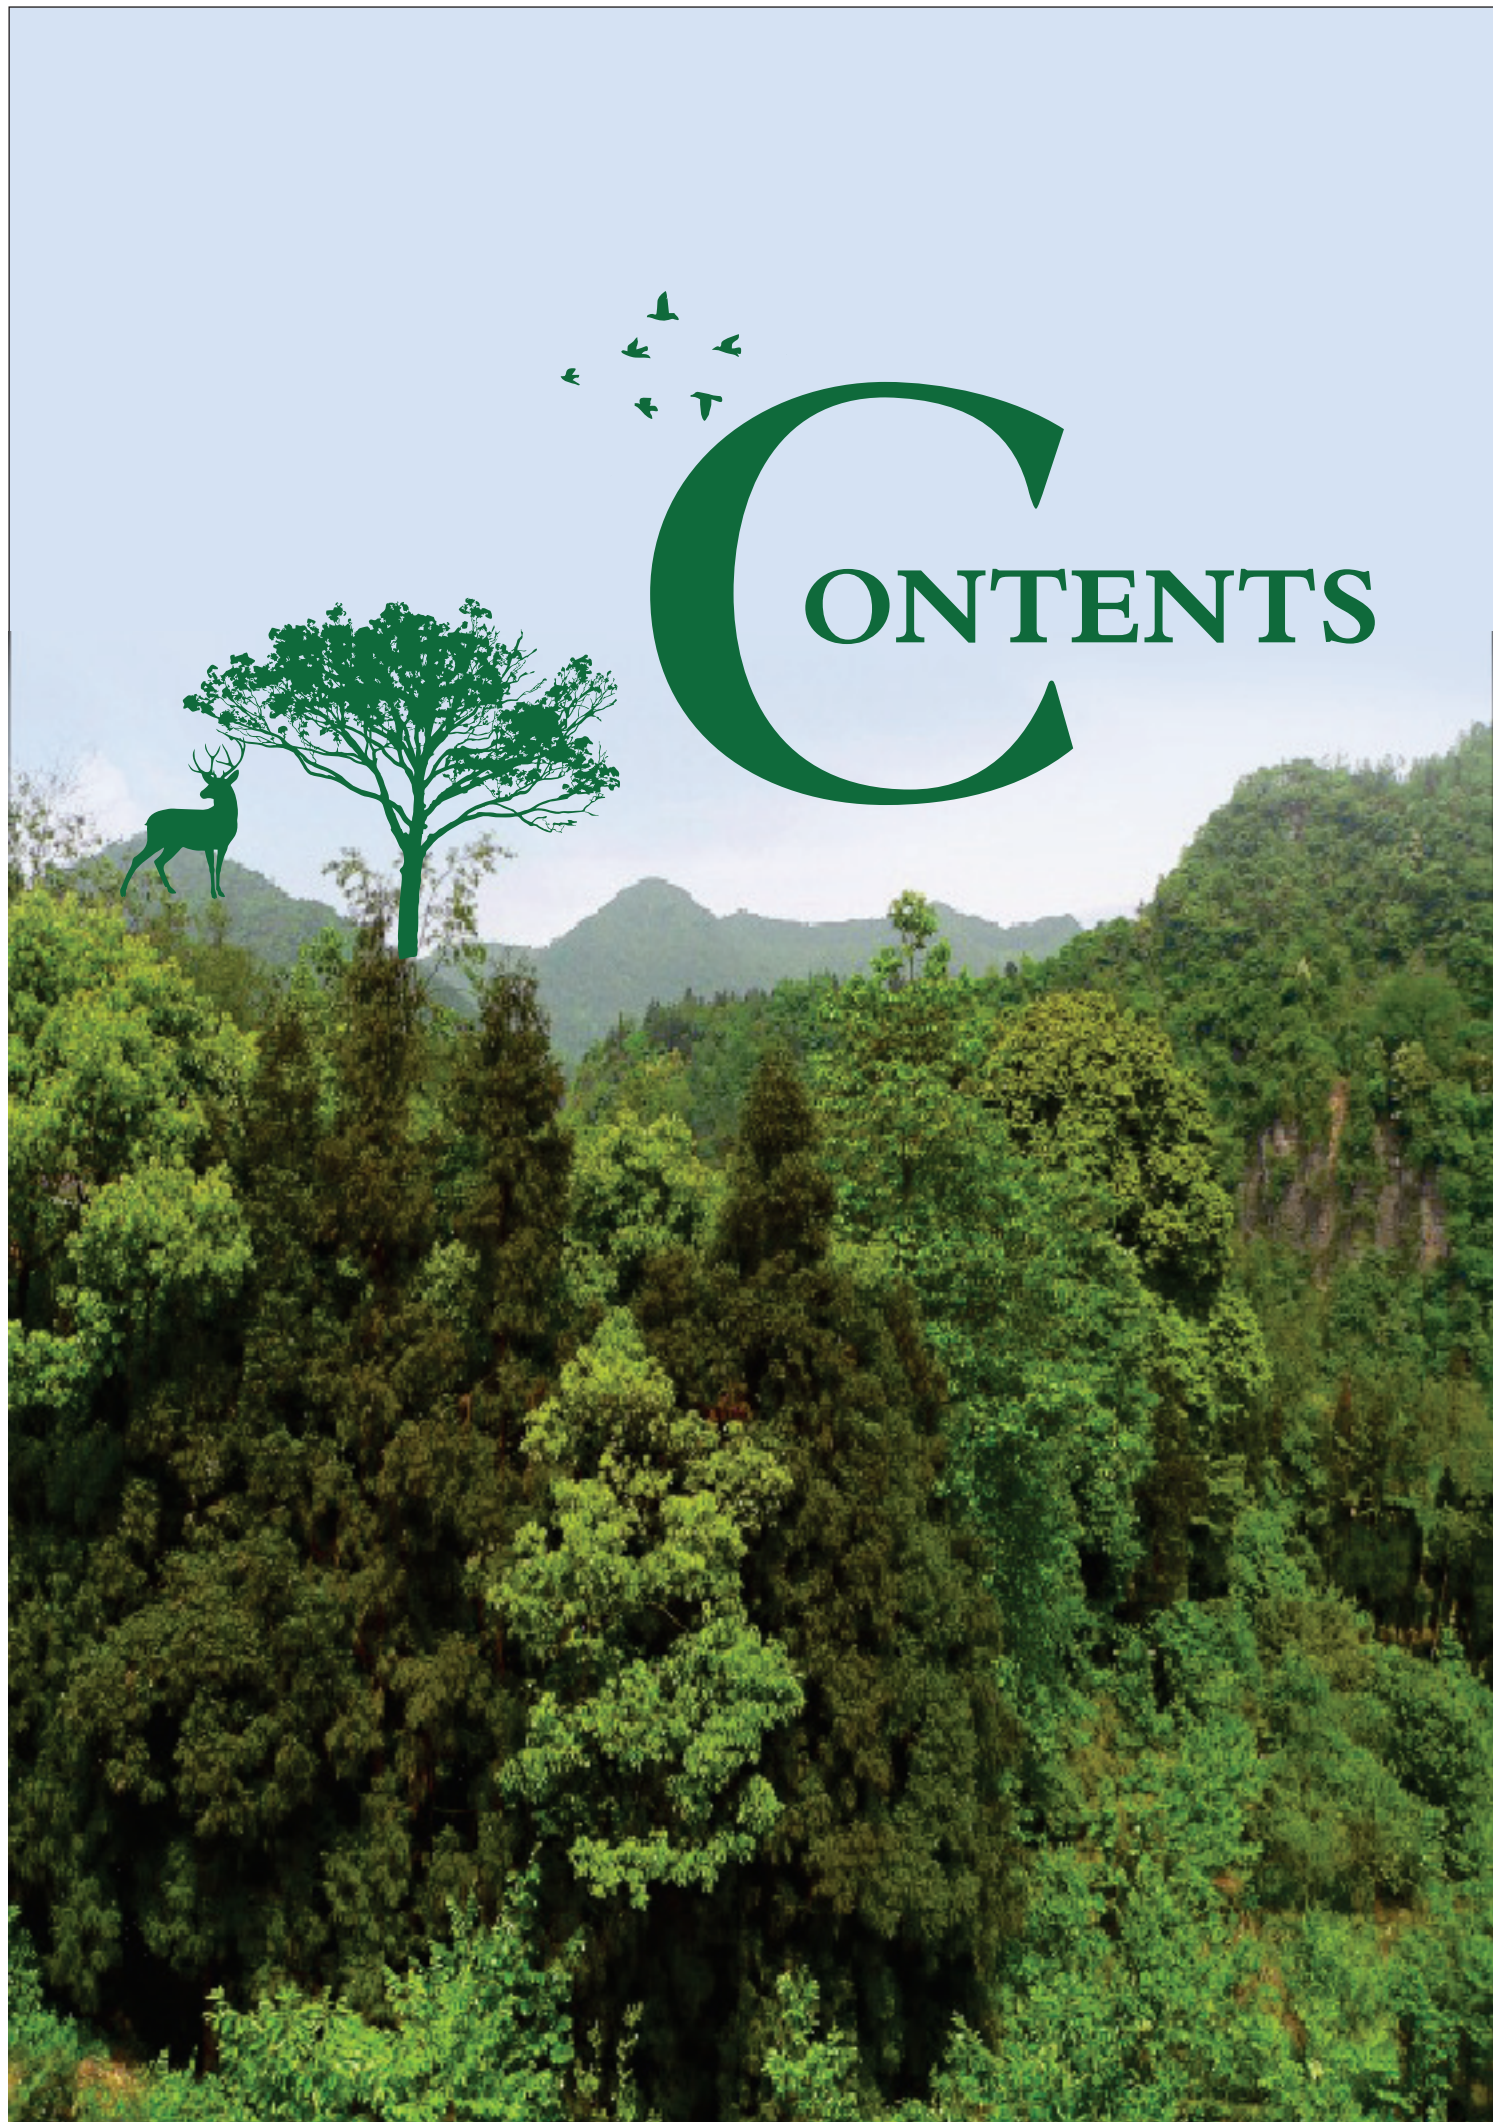

Sandeep Sundriyal, IFS
Principal Chief Conservator of Forests, Wildlife
& Chief Wildlife Warden, West Bengal

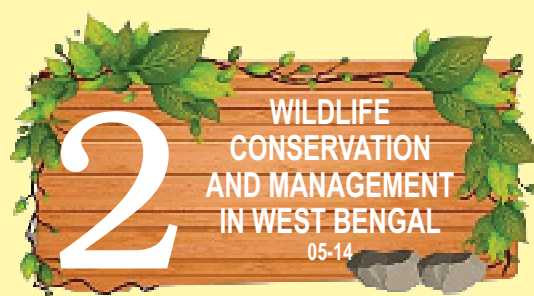

C

ONTENTS

INTRODUCTION TO THE STATE

01-04

1.01 Introduction to the State :

The State of West Bengal extends in the north from Himalayan Ranges to the Bay of Bengal in the south. The State is lying between 21°20'N to 27°32'N Latitude and 85°50'E to 89°52'E Longitude covering a geographical area of 88,752 sq.km. The State shares International Boundary with Nepal, Bhutan and Bangladesh. The total recorded forest land in the State is 11879 sq.kms, of which 7054 sq. kms are Reserved Forests, 3772 sq. kms are Protected Forests and rest 1053 sq. kms are Unclassed State Forests, thus constituting 13.38% of the geographical area of the State. South 24-Parganas district has the highest forest cover in respect to its land area of 42.37% followed by Darjeeling (40.07%) and Alipurduar (31.54%). [Source: ISFR – 2023, FSI].

The State of West Bengal is home to a rich and unbelieving variety of wildlife, from the famous Royal Bengal Tiger in the Gangetic delta of Sundarbans to the one-horned Indian Rhinoceros and Leopard lurking in the foothills of the Himalayas, West Bengal is home to an amazing array of flora and fauna. A number of migratory birds come to the State during winter and the State is also very rich in the diversity of butterfly.

At present, there are 6 (Six) National Parks, 16 (Sixteen) Wildlife Sanctuaries, 2 (Two) Tiger Reserves, 2 (Two) Elephant Reserves, 1 (One) Biosphere Reserve and 5 (Five) Conservation Reserves in the State. Wildlife in these Protected Areas includes the Royal Bengal Tiger, Indian Rhinoceros, Indian Elephant, Spotted Deer, India Bison (Gaur), Leopard and Crocodile. The high altitude forests like Singalila National Park shelter wild animals like Barking Deer, Red Panda, Himalayan Black Bear, Serow, Pangolin, and Kalij pheasants.

Sundarban is the only Mangrove-Tiger eco-system in the world. Apart from Tiger, Sundarban is home to many endangered animals like Gangetic Dolphin, Irrawady Dolphin, River Terrapin, Otter, Estuarine Crocodile etc. The Sundarban Biosphere Reserve was constituted by the Government of India in 1989 and it received the recognition of UNESCO under its Man and Biosphere programme in November, 2001.

Sundarban National Park, forming the Core Area of Sundarban Tiger Reserve, received the recognition as World Heritage Site by UNESCO in 1987.

The diversity of wildlife in the State of West Bengal is still a long way to be explored, as hitherto many unknown species are being recorded; in the camera trapping exercise in South 24 Parganas Division two photographs of rare Melanistic Leopard Cat was found. On the other hand in Buxa Tiger Reserve photographs have captured Clouded Leopard and Black Panther during Camera Trapping exercise.

CONSERVATION
AND MANAGEMENT
IN WEST BENGAL
05-14**

2.01 WILDLIFE CONSERVATION AND MANAGEMENT IN WEST BENGAL

In-Situ Conservation

Protection of Protected Areas and Wildlife Habitats:

Protection of habitat and control of poaching of wild animals are being given top priority through regular patrolling on foot, elephant back, by vehicle and speed boats. The protection measures are further augmented through improvement of communication network, supply of improved weapons to the wildlife guards, wildlife squads, Intelligence gathering, installation of watchtower at strategic points etc. inside the National Parks and Sanctuaries as well as in the areas important for wildlife conservation. Since poaching is always associated with the inter-state and/or international smuggling of the wildlife products, a regular co-ordination between various enforcement agencies like Police, BSF, Railway Police, Customs, Directorate of Revenue Intelligence etc. is maintained. The Wildlife Wing is actively liaising with the WCCB, Eastern Regional office as an integral part of the controlling wildlife crime. The latest measure taken by the Wildlife Wing, West Bengal for controlling / detection of wildlife crime is by introduction of Sniffer Dog Squads in different Protected Areas of the State. At present there are five such squads in South and North Bengal together. They are placed at Sukna of Mahananda Wildlife Sanctuary, Malbazar of Gorumara National Park, Madarihat of Jaldapara National Park, Rajabhatkhawa of Buxa Tiger Reserve and Sajnekhali of Sundarban Tiger Reserve.

Wildlife Management and Habitat Improvement:

Habitat Improvement Programme includes the canopy opening in monoculture teak plantations, followed by natural or artificial regeneration of grasses and planting of bamboo and tree fodder species. Development of water holes and wetland development through soil moisture conservation works have been implemented on top priority. Regular maintenance of fire lines is given priority to control ground fire. Grassland Management is one of the major activities in the Terai and Dooars forest areas; to increase the fodder base of herbivores, plantation of indigenous grasses is regularly undertaken. The plantation of fodder species in the Elephant Reserves is a key towards the elephant management and is being done widely for improving the fodder base of the elephants inside the forest.

Eco-development activities in and around the Protected Areas:

Management of National Parks and Sanctuaries has taken new dimensions in the involvement and meeting the livelihood demands of the local people inhabiting the fringes of the Protected Areas. It is well understood that the wildlife conservation programme will succeed only with the active involvement and cooperation of the local people.

To generate cooperation from the fringe area population, various schemes aimed both at the community and individual beneficiary are undertaken with an aim to generate alternate livelihood avenues, side by side with the community development of these fringe areas. Building of schools, roads, community centres, drinking water facilities, building of houses for the impoverished individuals, distribution of Sal-leaf plate making machines, herbal

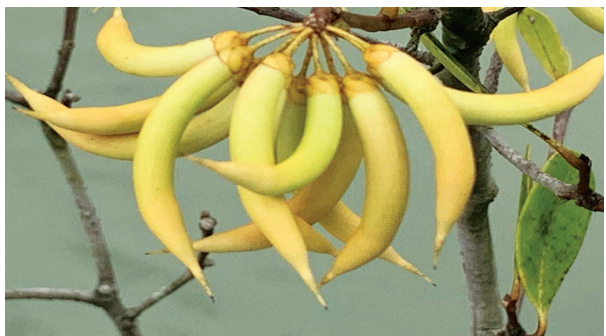

nurseries, eco-tourism projects, etc. are some of these activities undertaken by the Wildlife Wing in these fringe areas.

Organising, all the people who are living below poverty line into Self-Help Groups for livelihood generation in these communities has been one of the major successes of the Forest Department in the forest fringes.

Participatory Protected Area Management:

Since 1991, participatory protected area management has been initiated in the fringe villages bordering Jaldapara National Park, Mahananda Wildlife Sanctuary, Buxa Tiger Reserve and gradually the eco-development programme has been expanded to all the PAs. Eco-development is a strategy which aims to conserve biodiversity by reducing the negative impact of people on the PA as well as reducing the negative impact of PA on local people. The efforts are to improve the socio-economic conditions of fringe villages through some prioritized, site specific and need based eco-development activity package, so that their dependence on forest resources is gradually reduced.

Total 241 nos. of Joint Forest Management Committees have been formed in the fringe villages of National Parks and Sanctuaries with around **68,027 members** who are protecting flora and fauna of the State. The fringe area people around various PAs are now less dependent on the forest resources to earn their livelihood since alternative employment options have been created through eco-development programme in majority of these areas. The local communities are not only coming forward to protect the nearby forests but are also helping the forests staff to apprehend poachers. This active involvement of local people will make the task of bio-diversity conservation more effective in the long term.

2.07 Location of Protected Areas in West Bengal

2.08 Status of Management Plan/Tiger Conservation Plan (TCP) preparation

Protected areas of West Bengal	Present status	Remarks
Sundarban Tiger Reserve (including Sundarban N.P. and Sajnekhali W.L.S.)	Tiger Conservation Plan (TCP) has been approved for the period from 2017-18 to 2026-27	
Buxa Tiger Reserve (including Buxa N.P. and Buxa W.L.S.)	Tiger Conservation Plan (TCP) has been approved for the period from 2016-17 to 2026-27	
Jaldapara N.P.	Management Plan has been approved for the period from 2018-19 to 2027-28	
Gorumara N.P.	Management Plan has been approved for the period from 2022-23 to 2031-32	
Neora Valley N.P.	Management Plan has been approved for the period from 2022-23 to 2031-32	
Singalila N.P.	Management Plan has been approved for the period from 2013-14 to 2022-23	The preparation of Management Plan for the period from 2023-24 to 2032-33 is ongoing
Senchal W.L.S.	Management Plan has been approved for the period from 2012-13 to 2021-22	The preparation of Management Plan for the period from 2022-23 to 2031-32 is ongoing
Chapramari W.L.S.	Management Plan has been approved for the period from 2022-23 to 2031-32	
Mahananda W.L.S.	Management Plan has been approved for the period from 2022-23 to 2031-32	
Raiganj W.L.S.	Management Plan has been approved for the period from 2021-22 to 2030-31	
Bibhutibhusan W.L.S.	Management Plan has been approved for the period from 2011-12 to 2020-21	Draft Management Plan for the period from 2021-22 to 2031-32 under assessment
Bethuadahari W.L.S.	Management Plan has been approved for the period from 2013-14 to 2022-23	Draft Management Plan for the period from 2023-24 to 2032-33 under assessment
Ballavpur W.L.S.	Management Plan has been approved for the period from 2009-10 to 2019-20	The preparation of Management Plan for the period from 2020-21 to 2029-30 is ongoing
Ramnabagan W.L.S.	No approved Management Plan	
Chintamani Kar Bird Sanctuary	Management Plan has been approved for the period from 2015-16 to 2024-25	
Haliday Island W.L.S.	Management Plan has been approved for the period from 2008-09 to 2018-19	Draft Management Plan for the period from 2019-20 to 2028-29 under assessment
Lothian Island W.L.S.	Management Plan has been approved for the period from 2008-09 to 2018-19	Draft Management Plan for the period from 2019-20 to 2028-29 under assessment
West Sundarban W.L.S.	Management Plan has been approved for the period from 2016-17 to 2025-26	
Pakhi Bitan (Bird Sanctuary)	Yet to be prepared	Part of land of the Sanctuary is yet to be handed over by the District administration
Jorepokhri Salamander W.L.S.	Yet to be prepared	Under GTA

Management Plan of Mayurjharna Elephant Reserve approved for the period 2014-15 to 2023-24.

Ex-Situ Conservation

2.09 Ex-Situ Conservation of threatened wildlife species:

The *ex situ* conservation is an integral part of wildlife management. Species' re-introduction is one of the important ingredient of the *ex situ* conservation. In West Bengal, the rehabilitation and restocking of some of the endangered wild animals are going on for last few years. The translocation of chital deer in some of the PAs of North Bengal and the forest areas of South Bengal have been successfully undertaken. More than **2700** Chitals (Spotted Deer) have been translocated in these forests till this year. The release of estuarine crocodile and Batagur Baska are being done regularly in the Mangrove ecosystem of Sunderbans. Till date we have released around **600 crocodiles** in various creeks and rivers of Sundarbans to augment the population of this endangered species. The Wildlife Wing, West Bengal has a comprehensive planning at present to release four number Red Pandas (two males and two females) in Neora Valley National Park and Singhalila National Park. At present a study is being conducted in these PAs based on DNA analysis of Red Panda to assess the present status of Red Panda in the wild in association with IISER, Kolkata, Wildlife Institute of India and Zoological Survey of India.

2.10 Zoos in West Bengal

"Zoo" means an establishment, whether stationary or mobile, where captive animals are kept for exhibition to the public and includes a circus and rescue center but does not include an establishment of a licensed dealer in captive animals.

Most of us would have visited zoos at one point of time or another, usually during our childhood - with parents or as part of our school programmes. Many people think of a zoo as a place for relaxation, entertainment, a place to have a fun. But over the decades, zoos have got transformed into centres for wildlife conservation and environmental education.

All Zoos in West Bengal are controlled by the West Bengal Zoo Authority.

Zoos in West Bengal

Government Zoos

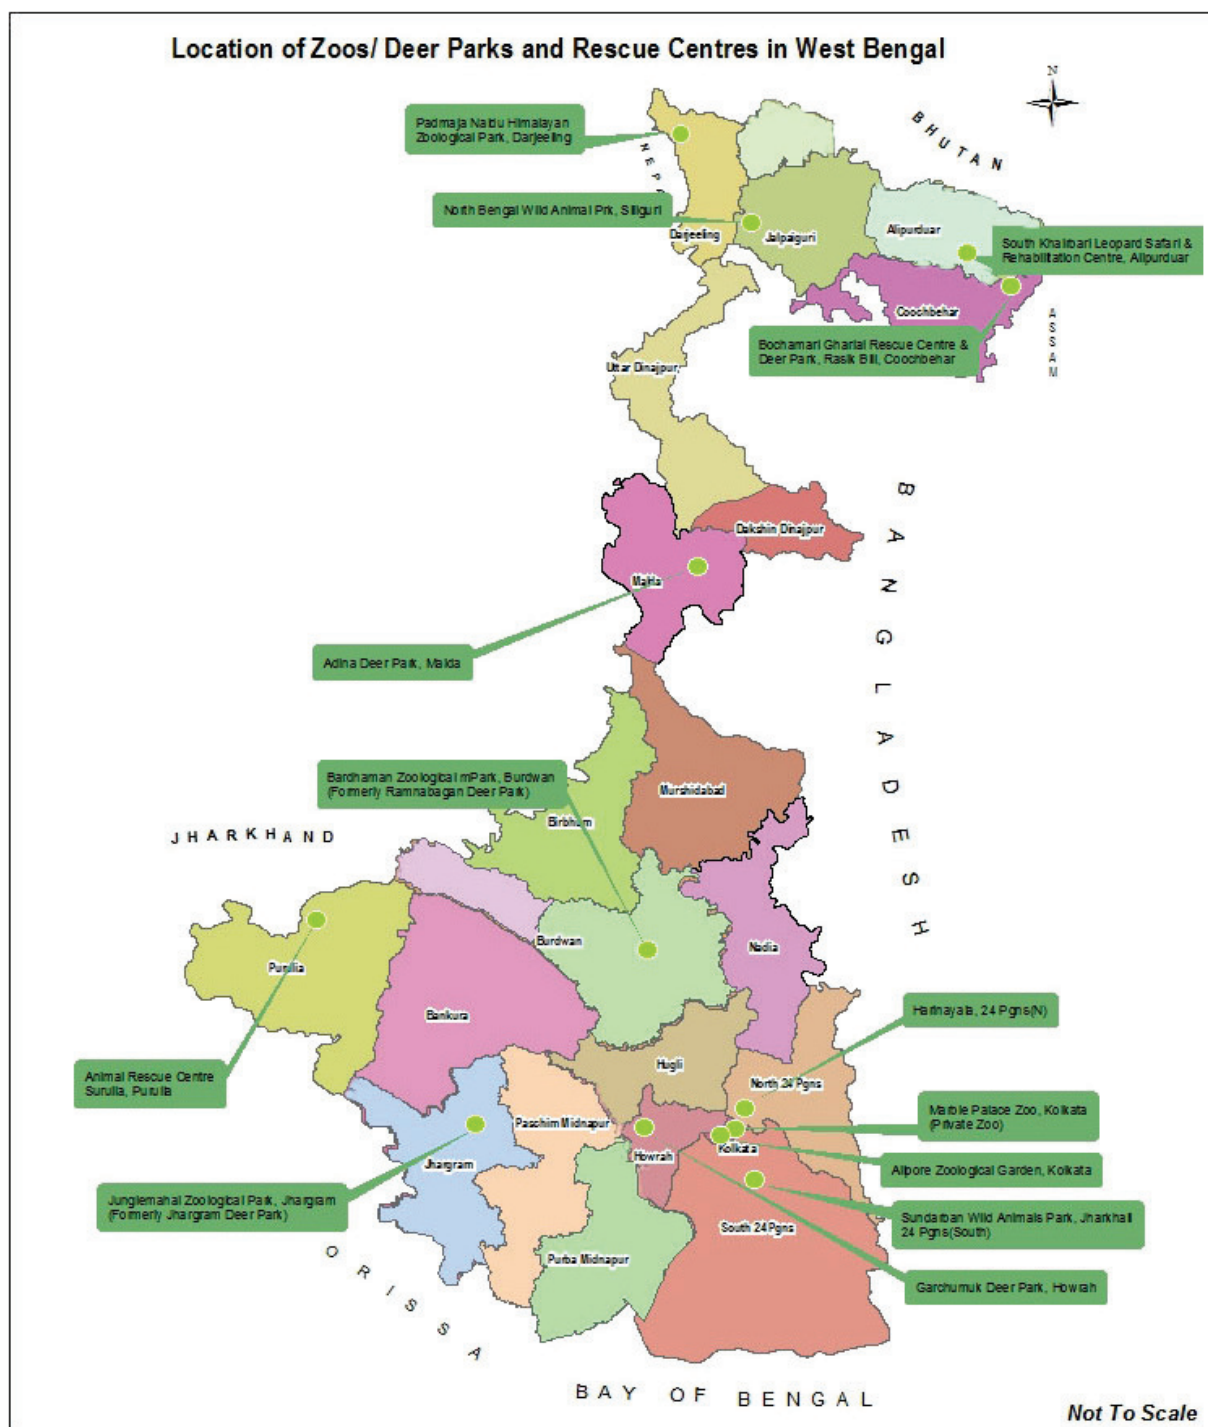

1. Adina Deer Park, Adina, Malda
2. Alipore Zoological Garden, Kolkata
3. Animal Rescue Centre, Surulia
4. Bardhaman Zoological Park, Bardhaman (formerly known as Ramnabagan Deer Park)
5. Bochamari Gharial Rescue Centre and Deer Park/ Rasik Beel
6. Garchumuk Deer Park, Garhchumuk, Howrah
7. Junglemahal Zoological Park, Jhargram (Formerly known as Jhargram Deer Park & Mini Zoo)
8. North Bengal Wild Animal Park, Siliguri
9. Padmaja Naidu Himalayan Zoological Park
10. South Khairbari Leopard Safari & Rehabilitation Centre, Coochbehar
11. Sundarban Wild Animals Park, Jharkhali (Jharkhali Satellite Zoo)
12. Harinalaya, Eco Park, New Town, Kolkata

Private Zoos

1. Marble Palace Zoo

2.11 Location of Zoos and Rescue Centres in West Bengal

2.12 Recognition Status of Rescue Centres / Deer Parks / Zoos in West Bengal

Sl. No.	Name	Division / District	Status
1.	Padmaja Naidu Himalayan Zoological Park	Darjeeling Division	Recognized upto 19.08.2022.

ESTIMATION OF WILD ANIMALS

15-20

Estimation of Wild Animals

Tiger (*Panthera tigris*):

The Bengal tiger inhabits a wide range of habitats, from the high-altitude, cold coniferous Himalayan forests to the streaming mangroves of the Sundarbans. At present, the tiger is found in the forests of Neora Valley, Buxa, Mahananda, Jaldapara in North Bengal and in Sundarban forests in South Bengal.

All India Tiger Estimation in Indian Sundarban Landscape 2022-23

Sundarbans is world's largest mangrove delta and only mangrove tiger habitat in the world. The Sundarban landscape comprises of two Divisions, 1) Sundarban Tiger Reserve 2) 24-Parganas (South) Division. The total area of Sundarban Tiger Reserve (STR) with its four Ranges (Sajnekhali Wildlife Sanctuary, Basirhat, National Park East and National Park West) is about 2585 sq kilometers. The three tiger bearing ranges of 24-Parganas (South) Division i.e, (Math, Raidighi, Ramganga) comprises of 1111.07 sq kilometer area in total.

According to the Tiger Estimation protocol of NTCA, in 2010 first All India Tiger Estimation exercise took place in Sundarbans. Since 2012, with the help of some Non-Government Organizations, Forest Department carried out the phase IV tiger estimation exercise as per the guidelines of NTCA. In the last couple of years the Forest Department is doing the exercise on its own with the help of outside players only for Logistics (cameras) support and training. In 2019-2020 session, during the months of December 2019 and January 2020, in line with Phase-IV monitoring protocol of NTCA, the Sundarban Tiger Reserve and the 24-Parganas (South) Division carried out camera trapping to monitor the tiger population in the Indian Sundarbans with 2 Sq. Km. grid composition.

The fifth cycle of All India Tiger Estimation (2022-23) covered forested habitats in 19 states of India. According to the Tiger Estimation protocol of NTCA, in 2010 first All India Tiger Estimation exercise took place in Sundarbans.

Camera Trapping Team Composition

- 10 teams in Sundarban Tiger Reserve and 6 teams in 24-Parganas (South) Division are composed for phase IV exercise by the Field Director.
- DFD, Sundarban Tiger Reserve and DFO, 24-Parganas (South) Division with coordinate the exercise in respective divisions.
- Along with the team leader, each team comprises of 10-12 personnel.
- Team leader reports to the concerned Range Officer on behalf of his team.
- In each team at least 3-4 armed personnel are present.
- The entire operation is to be planned and executed based on tidal movements. Some places can be reached only during high tide.

Results:

Unique tiger individuals photo captured (2018 & 2022), minimum tiger population and population estimate in each landscape, 2022.

Landscape	Unique tigers: Mt+1		Minimum population: CMR*	Population Estimate: SECR# (SE)
Sundarban Landscape	85	100	100	101(10)

Estimated tiger numbers in each landscape from 2006 to 2022 (Number in parenthesis is Standard Error). State population estimate do not add up to the landscape estimate due to common tigers, tiger outside protected areas, and spatial distribution of tiger activity centers. Tigers common between sites are counted only once in the landscape/state. Lower limit of the estimates should be truncated at the minimum number of photo-captured tigers.

State	Tiger Population				
West Bengal	2006	2010	2014	2018	2022
Northern West Bengal	10	-	3*	0	2
Sundarbans		70	76	88	101(10)

Source: Status of Tigers, Co-Predators & Prey in India 2022 by NTCA.

In 2023-24 session, during the months of November & December 2023 and January & February 2024, in line with Phase-IV monitoring protocol of NTCA, the Sundarban Tiger Reserve Division carried out camera trapping exercise to monitor the tiger population in the Indian Sundarban. A total of 105 tigers were identified from the entire Sundarbans Landscape.

Leopard (*Panthera pardus*) :

The leopard shows remarkable adaptability to different environments but prefers the forest fringe where it can utilize trees cover for shelter and safety and open area as observation platform. They are found in almost all the forest areas in north Bengal, with a sizeable population in and around the Protected Areas of Neora Valley, Buxa, Gorumara, Senchal, Mahananda, Chapramari, Jaldapara in North Bengal.

Leopard Census :

Year	Gorumara	Buxa	Jaldapara	Mahananda	Other areas	Total
1984	14	8	7	12	41	82
1989	14	50	5	10	29	108
1992	-	63	-	-	-	-
1993	2	-	9	2	94	107
2002	47	149	33	18	84	331
2004	43	Not done	28	26	67	164
2012		105 (BTR-West)				

The fifth cycle of leopard population assessment (2022) covered 20 states in India, conducting a foot survey spanning 6,41,449 km. to estimate carnivore signs and prey abundance.

Estimated leopard numbers in North Bengal from 2018 and 2022 (Number in parenthesis are one standard error limit of the mean).

2018 population (SE)	2022 population (SE)
83 (17)	233 (21)

Source: *Status of Leopards in India 2022* by NTCA.

Gaur (*Bos gauras*) :

Also known as the Indian Bison, the Gaur is a massive creature. Gaur is a herbivore and prefers grass. It is very common to see guar browsing on leaves or munching on the bark of select trees. In north Bengal, there is a sizeable population of gaur, especially in Neora valley, Jaldapara, Mahananda, Chapramari, Buxa etc.

Year	Total Number
1989	240
1993	425
1997	550
1998	530-560
2002	1180-1284
2009-10	Not less than 901 (Gorumara NP & Chapramari WLS only)
2012-13	414 BTR(W)
2013-14	782 BTR(W)

Elephant (*Elephas maximus*) :

The Asian Elephant (also known as the Indian Elephant) is a huge land animal. Elephants are found in Buxa, Gorumara, Mahananda, Chapramari, Jaldapara etc. in northern part of West Bengal. In South West Bengal the elephant are mainly seen in the districts of Bankura, Purulia and Paschim Medinipur.

Year	Total Number
1989	175
1993	186
1997	230-250
1998	230-250
2000	327
2002	328*
2005	North Bengal 300-350 & South Bengal 96
2007	North Bengal 300-350 & South Bengal 25 (excluding migratory population)
2010	North Bengal 529 & South Bengal 118 (including migratory population)
2017	All India Synchronized Elephant Population Estimation North Bengal – 488 nos. and South Bengal 194 nos. vide Project Elephant, Govt. of India's letter dated 14 th August, 2017
2023	North Bengal-630 Nos., South Bengal-180 Nos. as per field report

Rhinoceros (*Rhinoceros unicornis*) :

They are one of the largest land mammals. The Great Indian Rhinoceros has a single horn, usually upto 53 cm long. The rhino is found in the beautiful grassland and forests of Jaldapara and Gorumara.

Rhino Census:

Year	Jaldapara	Gorumara	Total
2006	108	27	135
2008		31	
2009	125		
2011	149	35 *	184
2012		43 *	
2013	186		
2014		50*	
2015	204	49 + 2 (Darjeeling WL Division)	255
2019	237	52	289
2022	292	55	347

*(Gorumara, Chapramari & adjoining areas of Gorumara NP & Chapramari WLS)

Crocodile (Salt water Crocodile) (*Crocodylus porosus*) :

STR & 24-Parganas (South) Division

Year	Indirect sighting	Direct sighting			
		Adult	Juvenile	Hatchling	Total
2012	99	69	61	10	140

A detailed population assessment exercise was planned and conducted during the month of January, 2024 (17-20 January, 2024) to assess the population status of the saltwater crocodiles in Indian Sundarbans and to increase the understanding of the habitat ecology of the species. Total direct and indirect sighting along the transect length of 1115 kilometers was 168 for the whole of Sundarban Biosphere Reserve. The estimated number of saltwater crocodiles in Indian Sundarbans is between a minimum of 204 up to 234.

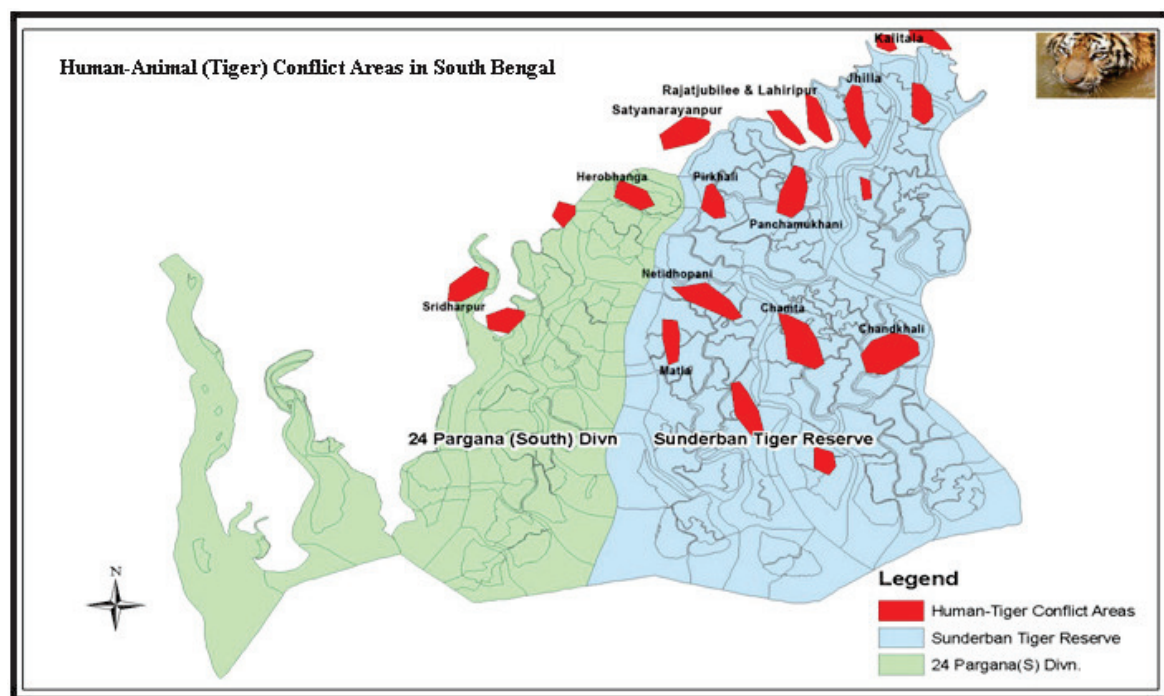

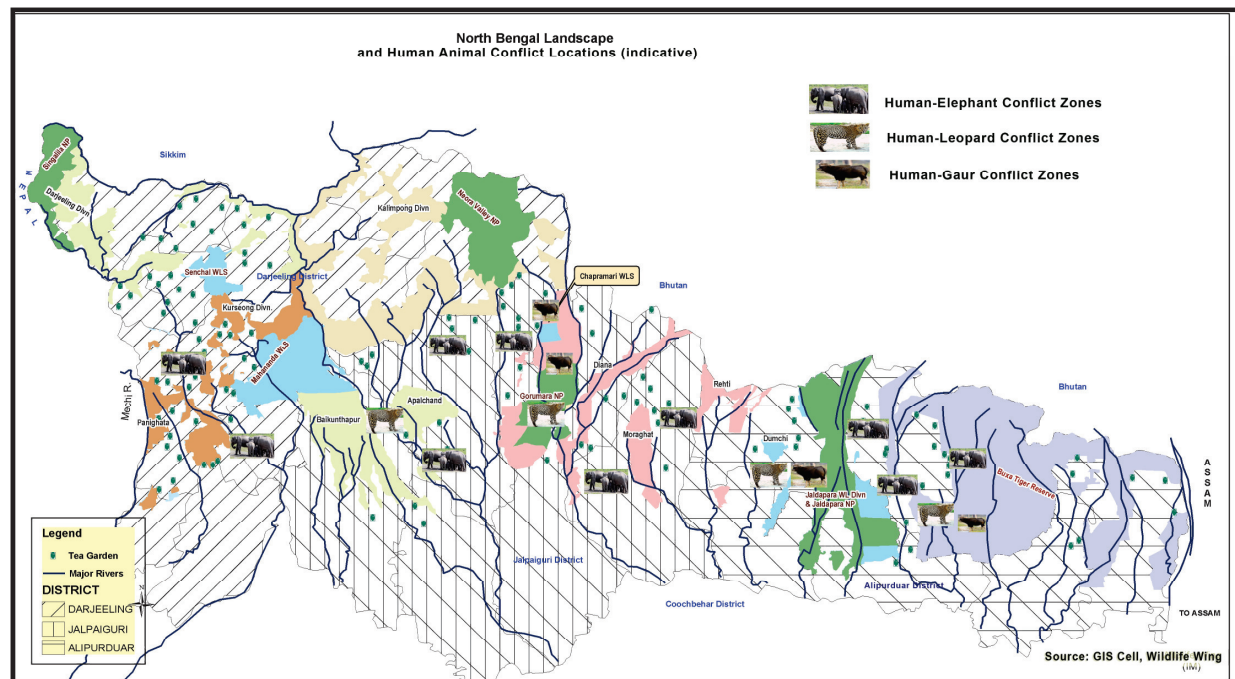

HUMAN - WILDLIFE CONFLICT

21-56

4.01 Human Wildlife Conflict Areas in West Bengal

A map of the study area in West Bengal, India. The map shows the locations of several villages: FARAUKA, SURI, MURARI, RAMPURHAT, RAGHUNATHGANJ, LALGOLA, and BHAGAWANGOLA. The map includes a river network and a shaded region representing the study area.

4.02 Human-Wildlife Conflict

Conflicts usually arise out of straying of wild animals into human habitations and result into either killing of the wild animals, or, death/injury of human beings and loss of crop/cattle/houses.

Man-elephant, Man-tiger, Man-leopard, Man-Gaur, Man-Rhino, Man-langur conflict and also conflict with other wild animals of late, have become more acute due to shrinkage of habitats and increased activities around the forests. Rapid expansion of human habitations, agriculture and tea gardens have not only encroached upon the forests and grasslands, but also cut off the corridors needed for migration of wide-ranging animals like elephants. Moreover, wanton grazing of cattle in the forest fringes and other forest areas have created acute pressure on the fodder of the large herbivores. Reduction of natural grassland and conversion of natural forests into value-added plantations of commercial species, until a couple of decades back, has further restricted the fodder base of the elephants and other wild animals. Poaching of deer and other smaller prey-animals has resulted into reduction in prey-base of big cats like tiger & leopard in some areas.

4.03 Death of Wild Animals during 2023-24 in West Bengal

Name of Animals	Natural	Unknown cause/ accident/ disease etc.	Retaliatory Killing	Poaching	Total
Elephant	9	15	0	1	25

01.11.2023	Tiger	Sridharnagar of Patharpratima under Ramganga Range	02.11.2023, in the early morning searching operation was started at village side to detect the tiger trail. In the meantime CF & Joint Director, SBR & Divisional Forest Officer, 24 Parganas (South) Division reached the spot & searching operation was conducted under their supervision. It was found that the strayed tiger had moved from Sridharnagar village side to Dhanchi R.F area. After getting this information, the 4 km area of that Reserve Forest which is adjacent to said village was cordoned by nylon net. Intensive patrolling was carried out through the village side as well as forest side. Two (2 nos.) cages with live baits were placed along the pugmark trail. Moreover, the peoples of the adjacent village were sensitized and massive awareness was generated and the tiger move back to forest	NIL	Tiger back to RF area

4.11 Mitigation of Conflict

A number of elephants die on the railway tracks passing through elephant corridors of North Bengal as well as South Bengal. To reduce such deaths, several steps have been taken by Directorate of Forests like, construction of 5 new passes in Chapramari Wildlife Sanctuary, 2 Ramps in Jaldapara National Parks, railway girders and rail fencing in Mahananda Wildlife Sanctuary, engagement of Elephant Trackers to monitor the movement of Wild Elephants and informing the same to Railways. However, elephant tracking cannot be done through whole of the 168 KM stretch tracks cutting across the forest north south and continuous monitoring of elephants inside forests is neither possible nor desirable, inside Protected Areas. Since the entire landscape of North Bengal is a very good habitat and is home for Asian Elephants, engaging trackers to track their movement is practically impossible as approx. 600 elephants are distributed either as loner or in herds and are migratory in nature.

The following actions are also being taken to prevent elephant deaths due to train accident :-

1. Speed limit restrictions of different trains are imposed at various stretches in North Bengal as per the decision taken in meeting with Railways.
2. Clearance of vegetation on the side of Railway track is going on for creating longer visibility to train drivers.
3. Signage of Board to pre-warn the Loco pilots in different places is done.
4. Forest Deptt.'s staff is posted in Alipurduar Junction Control Office, who is engaged in communication of elephant movement intimations from the field to control room of Railway for taking necessary action as soon as possible.
5. Railways Authority is requested to make general awareness among passengers to keep Railway track free from food waste that attracts elephants.
6. For South Bengal awareness has been created and signages are placed at the sensitive places of elephant crossing points.
7. Approval for work of survey on Elephant Corridors along the railway tracks in North Bengal has been given to the Asian Nature Conservation Foundation, Indian Institution of Science of Bangalore.
8. The field evaluation of functioning and feasibility of implementing the 'e-eye' surveillance system from Siliguri to Alipurduar Sector is going on.
9. An intrusion detection system (IDS) has been developed through a collaborative exercise between West Bengal Forest Department and NEF Railway, Alipurduar Division. The resultant device, a 37 km. long fibre optic sensor has been deployed between Madarihat and Nagrakata. This AI-enabled intrusion detection system (IDS) detects the presence of elephants and other wildlife on railway tracks using Distributed Acoustic Sensors (DAS) and immediately alerts the loco pilots about the close presence of animals along the rail tracks.

Merits of the Intrusion Detection System: Experience so far:

1. Early Warning: IDS can detect elephant or other heavy animal presence near railway tracks, providing early warning to train operators, enabling them to taken preventing measures.
2. Real-time Monitoring: IDS enables real-time monitoring of elephant movement near tracks, allowing for swift action.
3. 24/7 Surveillance: IDS provides round-the-clock surveillance without involvement of human intervention.

The following actions are taken for wildlife conservation:

1. Creating Protected Areas such as 16 numbers of Wildlife Sanctuaries and 6 numbers of National Parks.
2. Delegation of Powers under Section 5 of the Wildlife (Protection) Act, 1972:-
Powers have been assigned to all Territorial and Wildlife officers at different levels:
Addl. PCCFs (Wildlife & Territorial) have been declared the Addl. Chief Wildlife Wardens, and Chief Conservator of Forests / Conservator of Forests -- Deputy Chief Wildlife Wardens, Divisional Forest Officers -- Wildlife Wardens, Assistant Divisional Forest Officers -- Assistant Wildlife Wardens.
3. Notable wildlife conservationists have been designated as Honorary Wildlife Wardens, in their designated districts.
4. Regular and extensive patrolling by forest staff in Sanctuaries, National Parks and other forest areas to keep surveillance over the wildlife species.
5. Strengthening of communication & wireless network.
6. Provision of arms & ammunitions to the staff involved in protection work as per available stock.
7. Habitat Improvement – Creation of fodder grass and tree fodder plantation, creation of waterholes.
8. Training and awareness camps for JFMC and local villagers.
9. Construction of protection camps, watch towers, etc. at strategic locations to keep vigil.
10. Setting up of Forest Protection Force in vulnerable areas.
11. Establishment of intelligence network for collecting information and provision for rewards.
12. Coordination amongst various parallel law enforcement agencies, like Police, BSF, SSB, Customs, etc.
13. Establishment of legal cells in forest divisions to provide prosecution support.
14. Intensive monsoon patrolling.
15. Liaising with Wildlife Crime Control Bureau.
16. As per approval of the State Board for Wildlife in its 9th meeting on 10.02.15, West Bengal Wildlife Crime Control Co-ordination Committee has been formed with the PCCF, Wildlife and CWLW, WB as Chairman. Wildlife Crime Control Cell at South Bengal and Wildlife Crime Control Cell at North Bengal have been established with headquarters at Kolkata and Siliguri respectively.
17. Inter-State Co-ordination Committee to deal with problems of migratory elephants has been formed.
18. Preparation of databases for wildlife offenders as a precautionary measure in the enforcement initiatives.
19. Ecological restoration of critical wildlife corridors and routes has been taken to improve the efficacy of the movement of the elephants along the corridors.
20. Proposal for formation of Rapid Response Force (RRF) in vulnerable areas has been forwarded to the Govt. of West Bengal for necessary notification.

4.12 Measures taken for protection of migratory elephants across inter-state borders:

1. To increase inter-state Co-ordination in managing elephant depredation, different inter-state Co-ordination meetings of the Chief Wildlife Wardens were held between neighbouring states of West Bengal, Assam, Jharkhand, Odisha, Andhra Pradesh and Chattisgarh.
2. Electrocuting cells have been formed in the districts of Darjeeling, Jalpaiguri and Alipurduar involving representatives of Police, General Administration, Panchayet, Forest and West Bengal State Electricity Board. These cells are monitoring that no casualty is done by illegal electrocution. The Chief Conservator of Forests, Wildlife (North) has been authorized to monitor and report time to time.

3. Monthly Meeting to mitigate Human-Elephant Conflict :-

In order to review the present management practices of **human-elephant conflict in southern West Bengal**, regular meetings are convened by the PCCF, Wildlife and CWLW, WB involving CCFs of CC, WC, SWC and SEC at the Wildlife (Headquarters). The specific agenda items on which the meeting discusses are :

- 1) Functioning of Elephant Monitoring Co-ordination Committee (EMCC).
- 2) Submission of Daily Monitoring Report of Movement of Elephants.
- 3) Capacity Building Programmes on Tranquilization and Individual Elephant Identification.
- 4) Solitary Elephant Dossier.
- 5) Status of Compensation, in standard format.
- 6) Item-wise progress of various Central Sector Schemes.
- 7) Item-wise progress of State Plan schemes on Wildlife Conservation.
- 8) Miscellaneous.

4.13 Innovative Actions Taken to Mitigate Human Elephant Conflict in South West Bengal

1. **Elephant Driving Squad Vehicle** : A vehicle named as “Airawat” has been introduced in the Districts of Bankura, Paschim Medinipur, Jalpaiguri and Alipurduar for immediate action in elephant depredation situations and minimizing the loss to the villagers at the maximum level as this vehicle is equipped all modern technology to counter the situation.
2. **EMCC (Elephant Movement Co-ordination Committee)** : An EMCC for South Bengal headed by a CCF was formed vide PCCF, HoFF’s Order No. 19/Misc./CS/2016 Dated 04.04.2016 and it has been working very effectively, resulting in less damage and human deaths.
3. **Bulk SMS – Advance Warning System** : Bulk SMS System has been made operational in 60% areas in North Bengal since 23.05.2016 and that in South Bengal in 100% areas since 14.07.2016. this system alerts the people (the villagers, the public representatives, the Police) about the presence of Wild Elephant in the area.
4. **Issuance of Standard Operating Procedures(SOPs)** :
 - a. SOP on “ Emergency Arising Due to Straying of Wild Animals in Human Dominated Landscape in West Bengal” was issued vide PCCF, Wildlife & CWLW, WB’s Order No. 2012/WL/2W-769/2016 dated 15.04.2016 and is now operational.
 - b. SOP on “ Dealing with Carcass of Major Animals in West Bengal” was issued vide PCCF, Wildlife & CWLW, WB’s Order No. 2013/WL/2W-769/2016 dated 15.04.2016 and is now operational.
 - c. SOP on “Dealing with Human Casualty / Injury caused by Wild Animals in West Bengal” was issued vide PCCF, Wildlife & CWLW, WB’s Order No. 5233(4)/WL/2W-769/2016 dated 16.11.2016 and is now operational.
5. **Daily Monitoring of Elephants**: All the elephant affected Divisions submit report in a prescribed format giving the detailed location of wild elephant (loner / herd / maljurian / residential / migratory) with approximate number in their jurisdiction, on daily basis. This report is very important in coping with possible depredation of wild elephant and preparation of the same in advance which includes alerting the local villagers about the movement of the elephant(s) nearby. This practice has been made operational since May, 2016.

6. **Daily Monitoring of Human-Elephant Conflict :** All the elephant affected Divisions submit report in a prescribed format giving the details of death / injury of villagers / staff by wild animals/elephants with report of hut damage/crop damage etc. on daily basis. This practice has been operational since May,2016.
7. **Elephant Barriers :** A total of 140.848 kms of Elephant Proof Trench have been dug and 223.98 kms of Elephant Proof Electric Fencing have been erected to control elephant depredation in human populated areas.
8. **Watch Towers :** A total of 23 Watch Towers have been constructed in South Bengal in order to Mitigate the elephant depredation in villages.

4.14 Measures taken to prevent Human-Tiger conflict:

- a) The Nylon Net Fencing (NNF) has been erected over a length of about 100 kms. along village perimeters in areas where human settlements bordered the Sundarbans. This helps to physically prevent tigers from straying into human habitations. The older nylon net fencing are gradually being replaced by long endurance polypropylene polymer fence. Replacement of 40 kms. old fencing with polypropylene polymer fence has been completed at vulnerable stretches.
- b) A protocol for maintaining NNF has been developed. NNF are daily monitored by the staff / JFMC members and regularly repaired as per NNF Monitoring Protocol.
- c) Modern techniques for tranquilization and capturing equipments including highly sophisticated cages has been used to capture strayed out tigers from human dominated landscape.
- d) Constant awareness camps, JFMC meetings and public demonstration have been carried out throughout the year for prohibiting fishermen villagers from fishing in the restricted areas of the STR.
- e) Smart patrolling are carried out for monitoring the movement of tiger and to check the duties of the staff as per E-patrol protocol of the tiger reserves by using smart phones, mobile data.
- f) UAV/drone/trap camera are used for generating the live imageries and videos of movement of tiger as well as human being.

4.13 Monitoring the movement of tigers through electronic surveillance in Sundarbans:

E-Patrolling - Top-to-bottom monitoring of staff duty by using Smart phones, Mobile data, Internet etc. along with keen observing the movement of wild animals like tiger time to time and generating report thereof; implemented since 2015-16, approximately in half of the area of Sundarban Tiger Reserve.

Camera Trapping - Monitoring and photo or video-capturing the movement of tiger by using infrared-triggered camera method and management thereof. It is an ongoing implementation since 2011-12.

E-Protection Monitoring Protocol - Keen supervision and Monitoring of wild animals, offences, staff duty – all by using Smart phones, Mobile data, Internet etc.

Radio-Collaring - Radio-collaring of 10 tigers was initiated. After radio-collaring electronic signals are emitted from the transmitter within the radio collar wearing by living tiger and that was captured by the satellite and transmitted to the main server and through that their movements are monitored. Approved in 2013. Implementation is going on.

UAV - UAV technology is being implemented by using drone, that generates the live imageries and videos from the movement of tiger as well as human being and that will be easily monitored in any area.
